RENTAL SERVICE CONDITIONS

Happy Days carries out, on request, the delivery service with travel expenses charged to the recipient, calculated on the distance in kilometers, travel times, the means and personnel necessary for unloading, which will in any case take place on the ground floor of the place of delivery.

Any different conditions and / or access difficulties both for the entry of the vehicles and for the unloading of the material must be communicated at the time of the order: in the absence of such information, if the aforementioned circumstances arise, the unloading will be carried out in the place closest to that indicated, where the material must be stored for subsequent collection.

Please also always inform about the presence of pedestrian areas and / or limited traffic (ZTL), and the relative permits needed to access the unloading area.

The delivery date will be agreed with the customer and / or with the event location according to the availability of the latter, but following the deliveries plan that will be communicated by our management office just defined.

Any transport, assembly or disassembly at night, or on holidays, due to specific needs of the customer and / or the location, must be communicated at the time of the request and will be evaluated in their feasibility, and in case quantified under transport, as well as the unloading on different floors from the one on the ground.

The supervision of the materials, from the moment of delivery to collection, is the responsibility of the customer. The preparation and / or arrangement of the rented items is not within the competence of our staff, except for the assembly of marquees and flooring.

The material is delivered clean in the appropriate containers, where it must be stored after use: the dishes freed from food leftovers and in the quantities indicated in the box, the glasses turned upside down in the appropriate baskets, the linen in the relative bags, etc. The washing of the materials is at our expense, and included in the rental service.

In case of missing items, breakages or damage, checked at our warehouses during the washing and storage phase, a debit invoice will be issued based on the purchase costs (see "loss / breakage" column).

At the time of delivery, the presence of the customer or a person in charge is required who can check that the material complies with that ordered in type and quantity.

Any complaints in the event of failure to check will be handled according to the delivery program already in place, and with an additional charge for transport costs. Payment must be made by bank transfer according to the agreements made in the order phase with our management office.

The rental material and transport are subject to VAT as per law.
